# Contents

## VOLUME 27, NUMBER 1, FEBRUARY 2002

Published 4 March 2002

### Original Articles

- 1–6 Mate discrimination by females in the burying beetle *Nicrophorus orbicollis*: the influence of male size on attractiveness to females  
*Andria E. Beeler, Claudia M. Rauter and Allen J. Moore*
- 7–15 Spatial patterns, temporal variability, and the role of multi-nest colonies in a monogynous Spanish desert ant  
*Xim Cerdá, Abdallah Dahbi and Javier Retana*
- 16–24 Spatial correlations of *Diceroprocta apache* and its host plants: evidence for a negative impact from *Tamarix* invasion  
*Aaron R. Ellingson and Douglas C. Andersen*
- 25–32 Aphid population dynamics: does resistance to parasitism influence population size?  
*R. A. Hufbauer*
- 33–40 Mating behaviour and light conditions cause seasonal changes in the dispersal pattern of the satyrine butterfly *Lethe diana*  
*J.-Y. Ide*
- 41–48 The relationship between male head size and harem size in the sexually dimorphic mountain stone weta *Hemideina maori*  
*Ian G. Jamieson*
- 49–57 Life history of *Kladothrips ellobus* and *Oncothrips rodwayi*: insight into the origin and loss of soldiers in gall-inducing thrips  
*Brenda D. Kranz, Michael P. Schwarz, David C. Morris and Bernard J. Crespi*
- 58–67 Allometric plasticity in a polyphenic beetle  
*Armin P. Moczek*
- 68–75 Evaluating a putative mimetic relationship between two butterflies, *Adelpha bredowii* and *Limenitis lorquini*  
*Kathleen L. Prudic, Arthur M. Shapiro and Nicola S. Clayton*
- 76–83 Plant volatiles in the sexual communication of *Melolontha hippocastani*: response towards time-dependent bouquets and novel function of (Z)-3-hexen-1-ol as a sexual kairomone  
*J. Ruther, A. Reinecke and M. Hilker*

- 84–93 Seasonal changes in leaf nutritional quality influence grass miner performance  
*J. Scheirs, L. de Bruyn and R. Verhagen*
- 94–104 Cascading effects of variation in plant vigour on the relative performance of insect herbivores and their parasitoids  
*Tiit Teder and Toomas Tammaru*
- 105–114 A comparison of the host-zsearching efficiency of two larval parasitoids of *Plutella xylostella*  
*Xin-Gen Wang and M. A. Keller*
- 115–122 Prior flea beetle herbivory affects oviposition preference and larval performance of a potato beetle on their shared host plant  
*Michael J. Wise and Abigail M. Weinberg*
- 123–128 Immune expression in a damselfly is related to time of season, not to fluctuating asymmetry or host size  
*Christopher P. Yourth, Mark R. Forbes and Bruce P. Smith*

## VOLUME 27, NUMBER 2, APRIL 2002

Published 10 April 2002

### Original Articles

- 129–137 Body size as an estimator of production costs in a solitary bee  
*Jordi Bosch and Narcís Vicens*
- 138–144 Senescence of immune defence in *Bombus* workers  
*Claudie Doums, Yannick Moret, Elmar Benelli and Paul Schmid-Hempel*
- 145–151 Gamete production and sexual size dimorphism in an insect (*Orchesella cincta*) with indeterminate growth  
*G. Ernsting and J. A. Isaaks*
- 152–162 Risk-sensitive decisions during nesting may increase maternal provisioning capacity in the subsocial shield bug *Parastrachia japonensis*  
*Lisa Filippi, Mantaro Hironaka and Shintaro Nomakuchi*
- 163–168 Task-partitioned nectar transfer in stingless bees: work organisation in a phylogenetic context  
*Adam G. Hart and Francis L. W. Ratnieks*

- 169–176 Dung feeding in adult scarabaeines (tunnellers and endocoprids): even large dung beetles eat small particles  
*P. Holter, C. H. Scholtz and K. G. Wardhaugh*

- 177–188 Avoidance of occupied hosts by the Hessian fly: oviposition behaviour and consequences for larval survival  
*H. Kanno and M. O. Harris*

- 189–195 Facultative bacterial endosymbionts benefit pea aphids *Acyrtosiphon pisum* under heat stress  
*Clytia B. Montllor, Amy Maxmen and Alexander H. Purcell*

- 196–203 Apparent competition between two species of aphid via the fungal pathogen *Erynia neoaphidis* and its interaction with the aphid parasitoid *Aphidius ervi*  
*T. Pope, E. Croxson, J. K. Pell, H. C. J. Godfray and C. B. Müller*

- 204–212 Dispersal by bagworm larvae, *Metisa plana*: effects of population density, larval sex, and host plant attributes  
*Marc Rhainds, Gerhard Gries, Cheng Tuck Ho and Poh Soon Chew*

- 213–219 Probing behaviour of *Aphis craccivora* Koch on host plants of different nutritional quality  
*Violeta Traicevski and Seamus A. Ward*

- 220–228 Bimodal life cycle of the burying beetle *Nicrophorus quadripunctatus* in relation to its summer reproductive diapause  
*Tomoyosi Nisimura, Masahiro Kon and Hideharu Numata*

- 229–237 Contrasting frequencies of parasitism and host mortality among phorid and conopid parasitoids of bumble-bees  
*Michael C. Otterstatter, Troy L. Whidden and Robin E. Owen*

#### Short Communications

- 238–241 Ant-mediated dispersal of the black willow aphid *Pterocomma salicis* L.: does the ant *Lasius niger* L. judge aphid-host quality?  
*C. Matilda Collins and Simon R. Leather*

- 242–246 The effect of foundress number on sex ratio under partial local mate competition  
*Gabriel Debout, Xavier Fauvergue and Frédéric Fleury*

- 247–250 Ant-dependent oviposition in the membracid *Publilia concava*  
*Manuel A. Morales*

- 251–253 A novel technique for relocating concealed insects  
*R. W. Piper and S. G. Compton*

#### New Perspectives

- 254–256 Will climate change have a different impact on different trophic levels? Phenological development of winter moth *Operophtera brumata* and its host plants  
*Allan D. Watt and Anne M. McFarlane*

#### VOLUME 27, NUMBER 3, JUNE 2002

Published 10 May 2002

#### Original Articles

- 257–270 Dung beetles in a Central Amazonian rainforest and their ecological role as secondary seed dispersers  
*Ellen Andresen*

- 271–278 Influence of atmospheric carbon dioxide enrichment on induced response and growth compensation after herbivore damage in *Lotus corniculatus*  
*Alain Bazin, Marcel Goverde, Andreas Erhardt and Jacqui A. Shykoff*

- 279–284 A trade-off between diapause duration and fitness in female parasitoids  
*Jacintha Ellers and Jacques J. M. van Alphen*

- 285–291 Egg cannibalism by *Coleomegilla maculata lengi* neonates: preference even in the presence of essential prey  
*Isabelle Gagné, Daniel Coderre and Yves Mauffette*

- 292–301 Host utilisation by moth and larval survival of pine processionary caterpillar *Thaumetopoea pityocampa* in relation to food quality in three *Pinus* species  
*José A. Hódar, Regino Zamora and Jorge Castro*

- 302–307 The phenological window of opportunity for early-season birch sawflies  
*Jocelyn Martel and Antti Kause*

- 308–316 An experimental examination of the effects of habitat quality on the dispersal and local abundance of the butterfly *Parnassius smintheus*  
*Stephen F. Matter and Jens Roland*

- 317–325 Migration and Allee effects in the six-spot burnet moth *Zygaena filipendulae*  
*Rosa Menéndez, David Gutiérrez and Chris D. Thomas*

- 326–336 Differences in host plant selection among three *Athalia* sawflies feeding on crucifers in Japan  
*Koukichi Nagasaka and Naota Ohsaki*
- 337–345 Chemical defence of *Battus philenor* larvae against attack by the parasitoid *Trogus pennator*  
*Karen Sime*
- 346–354 Priority effects of bamboo-stump mosquito larvae: influences of water exchange and leaf litter input  
*Toshihiko Sunahara and Motoyoshi Mogi*
- 355–361 Caste-specific N and C isotope ratios in fungus-growing termites with special reference to uric acid preservation and their nutritional interpretation  
*I. Tayasu, F. Hyodo and T. Abe*

#### Short Communications

- 362–365 Gall insect and endophytic fungal co-occurrence in a xeric and mesic site  
*Alan C. Gange, Rachel Croft and Wenping Wu*
- 366–372 Does a cyclic natural thermal cure occur in *Wolbachia*-infected *Trichogramma* species?  
*B. Pintureau, F. Lassablière, J. Daumal and S. Grenier*
- 373–377 Fitness advantage from nuptial gifts in female fireflies  
*Jennifer Rooney and Sara M. Lewis*

#### New Perspectives

- 378–384 Body size and fitness in Odonata, stabilising selection and a meta-analysis too far?  
*David J. Thompson and Ola M. Fincke*

#### VOLUME 27, NUMBER 4, AUGUST 2002

Published 20 July 2002

#### Critical Appraisal

- 385–395 Community effects of praying mantids: a meta-analysis of the influences of species identity and experimental design  
*William F. Fagan, Matthew D. Moran, Jessamy J. Rango and Lawrence E. Hurd*

#### Original Articles

- 396–402 A minimalist approach to the effects of density-dependent competition on insect life-history traits  
*Philip Agnew, Mallorie Hide, Christine Sidobre and Yannis Michalakis*

- 403–414 Geographical variation in host–ant specificity of the parasitic butterfly *Maculinea alcon* in Denmark  
*Thomas Damm Als, David R. Nash and Jacobus J. Boomsma*
- 415–423 Intraspecific competition between healthy and parasitised hosts in a host–parasitoid system: consequences for life-history traits  
*Carlos Bernstein, Annie Heizmann and Emmanuel Desouhant*
- 424–432 The use of artificial neural networks in ecological analysis: estimating microhabitat temperature  
*Simon R. Bryant and Tim G. Shreeve*
- 433–440 Triangular fecundity function and ageing in ladybird beetles  
*A. F. G. Dixon and B. K. Agarwala*
- 441–447 Uptake of Bt-toxin by herbivores feeding on transgenic maize and consequences for the predator *Chrysoperla carnea*  
*A. Dutton, H. Klein, J. Romeis and F. Bigler*
- 448–456 Patterns of pollen feeding and habitat preference among *Heliconius* species  
*Catalina Estrada and Chris D. Jiggins*
- 457–466 Effects of meadow suitability on female behaviour in the alpine butterfly *Parnassius smintheus*  
*S. Fownes and J. Roland*
- 467–474 Nourishment affects colony demographics in the paper wasp *Polistes metricus*  
*J. H. Hunt and M. A. Dove*
- 475–483 Opposing survivorship and fecundity effects of host phenology on the gall-forming aphid *Hormaphis hamamelidis*  
*Brian Rehill and John Schultz*
- 484–492 Density-mediated responses of bark beetles to host allelochemicals: a link between individual behaviour and population dynamics  
*Kimberly F. Wallin and Kenneth F. Raffa*
- 493–498 Sexual size dimorphism in the two spot ladybird beetle *Adalia bipunctata*: developmental mechanism and its consequences for mating  
*Hironori Yasuda and Anthony F. G. Dixon*

#### Short Communications

- 499–504 Fine-scale ecological and genetic variation in a *Chorthippus* grasshopper hybrid zone  
*Jon R. Bridle, John Vass-de-Zomba and Roger K. Butlin*

- 505–508 Between- and within-population morphological comparisons of all castes between monogynous and polygynous colonies of the ant *Myrmica kotokui*  
*Tomonori Kikuchi*

#### *New Perspectives*

- 509–512 The debate about density dependence – a polemic  
*Christian Haak*

### VOLUME 27, NUMBER 5, OCTOBER 2002

*Published 12 September 2002*

#### *Editorial*

- 513 Excellence in ecological entomology – The Royal Entomological Society's Awards for Scientific Writing  
*S. R. Leather*

#### *Original Articles*

- 514–520 Using age grading by wing injuries to estimate size-dependent adult survivorship in the field: a case study of the yellow dung fly *Scathophaga stercoraria*  
*Dieter U. Burkhard, Paul I. Ward and Wolf U. Blanckenhorn*
- 521–528 Relationships between oviposition date, hatch date, and offspring size in the grasshopper *Chorthippus brunneus*  
*Andrew Cherrill*
- 529–540 Preference and performance are correlated in the spittlebug *Aphrophora pectoralis* on four species of willow  
*Timothy P. Craig and Takayuki Ohgushi*
- 541–553 Testing for context-dependence in a processing chain interaction among detritus-feeding aquatic insects  
*Matthew P. Daugherty and Steven A. Juliano*
- 554–564 The effects of exposure to seaweed on willingness to mate, oviposition, and longevity in seaweed flies  
*Derek W. Dunn, Caroline S. Crean and André S. Gilburn*
- 565–573 Dynamics of springtail and mite populations: the role of density dependence, predation, and weather  
*Steven H. Ferguson and Damien O. Joly*
- 574–580 Metapopulation dynamics of a flightless alpine insect *Hemideina maori* in a naturally fragmented habitat  
*Paul T. Leisnham and Ian G. Jamieson*

- 581–587 Flexible use of patch marks in an insect predator: effect of sex, hunger state, and patch quality  
*Yoshitaka Nakashima, Mayumi Teshiba and Yoshimi Hirose*

- 588–600 Spatial and temporal variation in the parasitoid assemblage of an exophytic polyphagous caterpillar  
*John O. Stireman III and Michael S. Singer*

- 601–607 The effect of past and current hosts on reproductive investment by the adult cowpea aphid *Aphis craccivora*  
*Violeta Traicevski and Seamus A. Ward*

- 608–617 Allee effect in larval resource exploitation in *Drosophila*: an interaction among density of adults, larvae, and micro-organisms  
*Bregje Wertheim, Julien Marchais, Louise E. M. Vet and Marcel Dicke*

#### *Short Communications*

- 618–621 Desiccation of *Pinus* foliage induced by conifer sawfly oviposition: effect on egg viability  
*Sylvio G. Codella and Kenneth F. Raffa*
- 622–625 Oviposition stimuli for host plant recognition and clutch size determination in a leaf-mining moth  
*Hideki Kagata and Takayuki Ohgushi*
- 626–630 Host-mediated effects of feeding by winter moth on the survival of *Eucraphis betulae*  
*J. T. Staley and S. E. Hartley*
- 631–637 Landscape context affects trap-nesting bees, wasps, and their natural enemies  
*Ingolf Steffan-Dewenter*

#### *New Perspectives*

- 638–640 Flowers at the front line of invasion?  
*Jaboury Ghazoul*

### VOLUME 27, NUMBER 6, DECEMBER 2002

*Published December 2002*

#### *Original Articles*

- 641–650 High-altitude migration of the diamondback moth *Plutella xylostella* to the U.K.: a study using radar, aerial netting, and ground trapping  
*Jason W. Chapman, Don R. Reynolds, Alan D. Smith, Joe R. Riley, David E. Pedgley and Ian P. Woivod*

- 651-659 Parasitism by the mite *Trombidium brei* on four U.K. butterfly species  
L. Conradt, S. A. Corbet, T. J. Roper and E. J. Bodsworth
- 660-664 Oviposition patterns in a predatory mite reduce the risk of egg predation caused by prey  
Farid Faraji, Arne Janssen and Maurice W. Sabelis
- 665-673 Thermal ecology of western tent caterpillars *Malacosoma californicum pluviale* and infection by nucleopolyhedrovirus  
Leonardo Frid and Judith H. Myers
- 674-685 Effects of photoperiod, temperature, and host plant age on induction of reproductive diapause and development time in *Danaus plexippus*  
Liz Goehring and Karen S. Oberhauser
- 686-691 Conspicuous colouration attracts prey to a stationary predator  
Mark E. Hauber
- 692-701 Life-cycle variation in the aphid *Sitobion avenae*: costs and benefits of male production  
Alvin J. Helden and A. F. G. Dixon
- 702-712 Lack of evidence for reproductive isolation among ecologically specialised lycaenid butterflies  
C. C. Nice, J. A. Fordyce, A. M. Shapiro and R. Ffrench-Constant
- 713-719 Seasonal sex ratio and unbalanced investment sex ratio in the Banksia bee *Hylaeus alcyoneus*  
Dean R. Paini and Winston J. Bailey
- 720-731 Between-forest variation in vertical stratification of drosophilid populations  
Shin-Ichi Tanabe
- 732-744 Differential vulnerability of prey to an invading top predator: integrating field surveys and laboratory experiments  
Guy Woodward and Alan G. Hildrew
- 745-752 Flexibility in the composition and concentration of amino acids in honeydew of the drepanosiphid aphid *Tuberculatus quercicola*  
Izumi Yao and Shin-Ichi Akimoto

#### Short Communications

- 753-757 Do leaf shelters always protect caterpillars from invertebrate predators?  
Meg T. Jones, Ignacio Castellanos and Martha R. Weiss
- 758-762 Cornicle length in Macrosiphini aphids: a comparison of ecological traits  
Edward B. Mondor, Bernard D. Roitberg and Bernhard Stadler
- 763-765 Measuring the sperm competition successes of field males of the yellow dung fly  
Paul I. Ward, Nina Wedell, David J. Hosken and Tom Tregenza

766 Author index
